Reinventing The Wheel.

 BENETEAU

The Beneteau 323 With Patented Pivoting Wheel.

They say you can't reinvent the wheel. But we did. And what's more, we patented it. It's the innovative pivoting wheel on the Beneteau 323. An easy-to-operate latch releases the wheel and allows it to rotate ninety degrees. This action swings the wheel in alignment with the boat's centerline - giving clear access through the cockpit from transom to companionway.

The pivoting wheel is just one of the features that illustrate an extreme attention to detail on this elegant 32 foot yacht. Designed by Groupe Finot, the Beneteau 323 follows the great success of the Beneteau 423 and 473. Neither comfort nor performance have been forsaken. She has a hull that was built with safety and stability in mind. Her interior is filled with light and ventilation. And she is equipped with the finest in marine hardware and components.

A Century Of Boatbuilding Excellence.

Designed to be easily sailed singlehanded, the cockpit and lines on the Beneteau 323 have been thoughtfully planned. All lines lead back to the cockpit, including sheets, furling and reefing lines. On deck, there is high grade Lewmar® marine hardware. And her suit of sails is specially cut by Neil Pryde®.

The Beneteau 323 is a sailboat built and designed by seasoned and accomplished sailors - so you know she will perform on the water. While she looks beautiful in her slip at the yacht club, she was born for the open seas. You can feel confident taking her there - and returning home. Her hull-to-deck construction is built with a century strong tradition of dependability and safety. In fact, Beneteau sailboats have logged over five million miles without a single recorded structural hull failure.

More Features Than You Expect In 32 Feet.

Below decks, the Beneteau 323 highlights the fine joinery and exquisite woodwork that have become Beneteau hallmarks. Large, panoramic ports allow light to fill the salon area. For those long distance cruises (or just when you have lots of guests on board), ample storage is available throughout - in the galley, the salon, and cabins.

In the head, a separate shower area provides a bit of luxury rarely found on a sailboat this size. And, the well-equipped galley is designed with the seafaring chef in mind. It's an imaginative new design that incorporates both freedom of movement and practical amenities.

It's this kind of attention to the smallest detail and responsiveness to our owners' needs that has made Beneteau the world's leading manufacturer of production sailboats. To learn more, contact your Beneteau Dealer today. Or, visit online at www.beneteauusa.com
