50SW

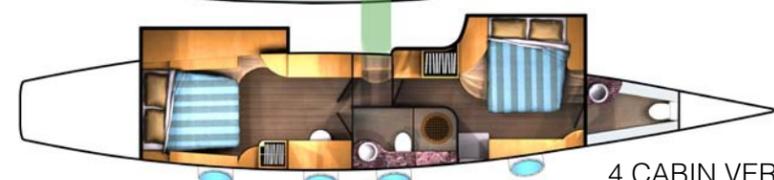

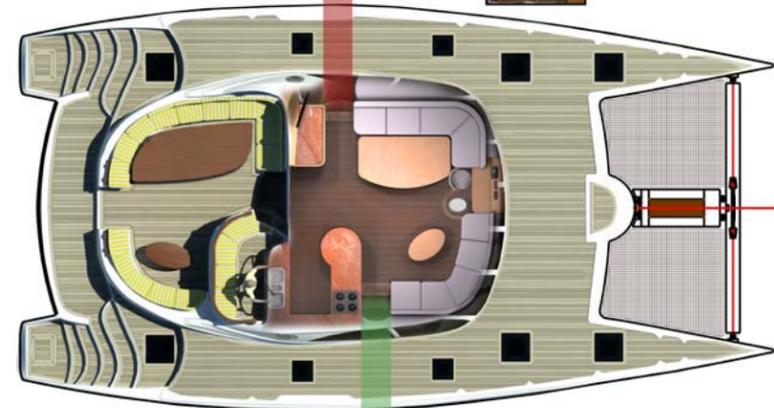

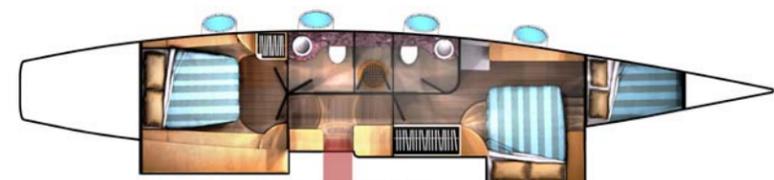

The P-50S is a comfortable blue water cruiser, around the bay or around the world. First class accommodations for up to eight guests are available in three to four spacious bedrooms including double beds and three to four heads with separate showers. In the three-bedroom version, the master suite, located within a dedicated hull, boasts a desk, settee, and bathroom with double sinks and a separate toilet.

Guests are pampered with lush interiors: the expansive salon and staterooms feature hand crafted wood interiors, high-quality leather and genuine granite counters. The vast cockpit offers both cocktail and dining seating for the largest parties and an airy raised steering station with teak trimmed oversized wheel.

50SW

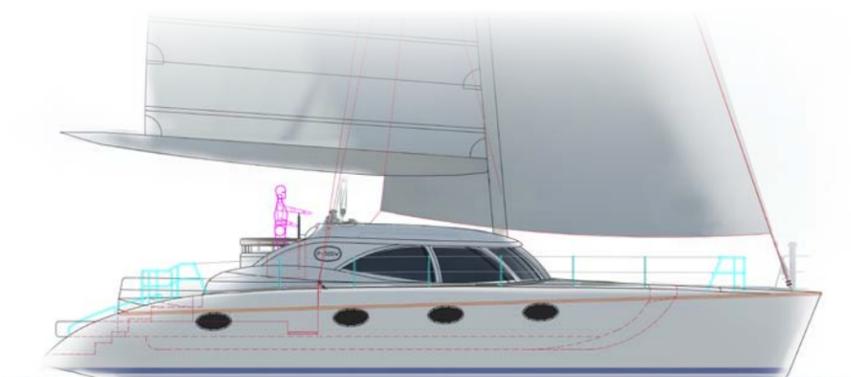

The interior space, level of "fit and finish" and value are unmatched by any other yacht in its class.

The Prout name speaks for itself: Prout has been synonymous with excellence in yacht construction since its founding in 1954 by Roland and Francis Prout. In 50 years of production over 4,200 cruising catamarans have been built. Each hull and deck is constructed using the most technically advanced infusion techniques resulting in a boat with the highest strength to weight ratio.

Utilizing high-grade quad-axial E-glass fiber sandwiched around a structural foam core with elasticity, thickness, and density properties selected specifically for the different areas of the yacht, Prout infuses the entire hull, deck, furniture or bulkhead laminate in one piece using either epoxy or vinylester resins which have superior mechanical properties to the polyester resin that other builders use. The infusion process creates a structure which is both lighter and stronger than a traditional layup allowing the yacht to carry more while also increasing safety.

Prout's total unsinkability and the incredible strength of Prout's resin infusion process mean that a Prout can cruise in the most difficult seas with a greater degree of safety and comfort than any other vessel available.

Prout 50SW Sailing Catamaran Specifications

Length Overall	15.24 m	50.00 ft
Length Waterline	13.33 m	43.72 ft
Beam	8.32 m	27.29 ft
Draft	1.25 m	4.11 ft
Displacement (Light)	16 tons	35,000 lbs
Displacement (Heavy)	21 tons	46,000 lbs
Fuel Capacity	757 liters	200 US gallons
Water Capacity	1,628 liters	260 US gallons
Mainsail Area	88.6 m ²	954 ft. ²
Genoa Area	60.9 m ²	656 ft. ²
Sail Area	149.5 m ²	1,610 ft. ²
Height of Mast (above the water)	21.66 m	71.05 ft
Engines	2 x 55HP Diesel Saildrive
